

Amendments to the CLAIMS

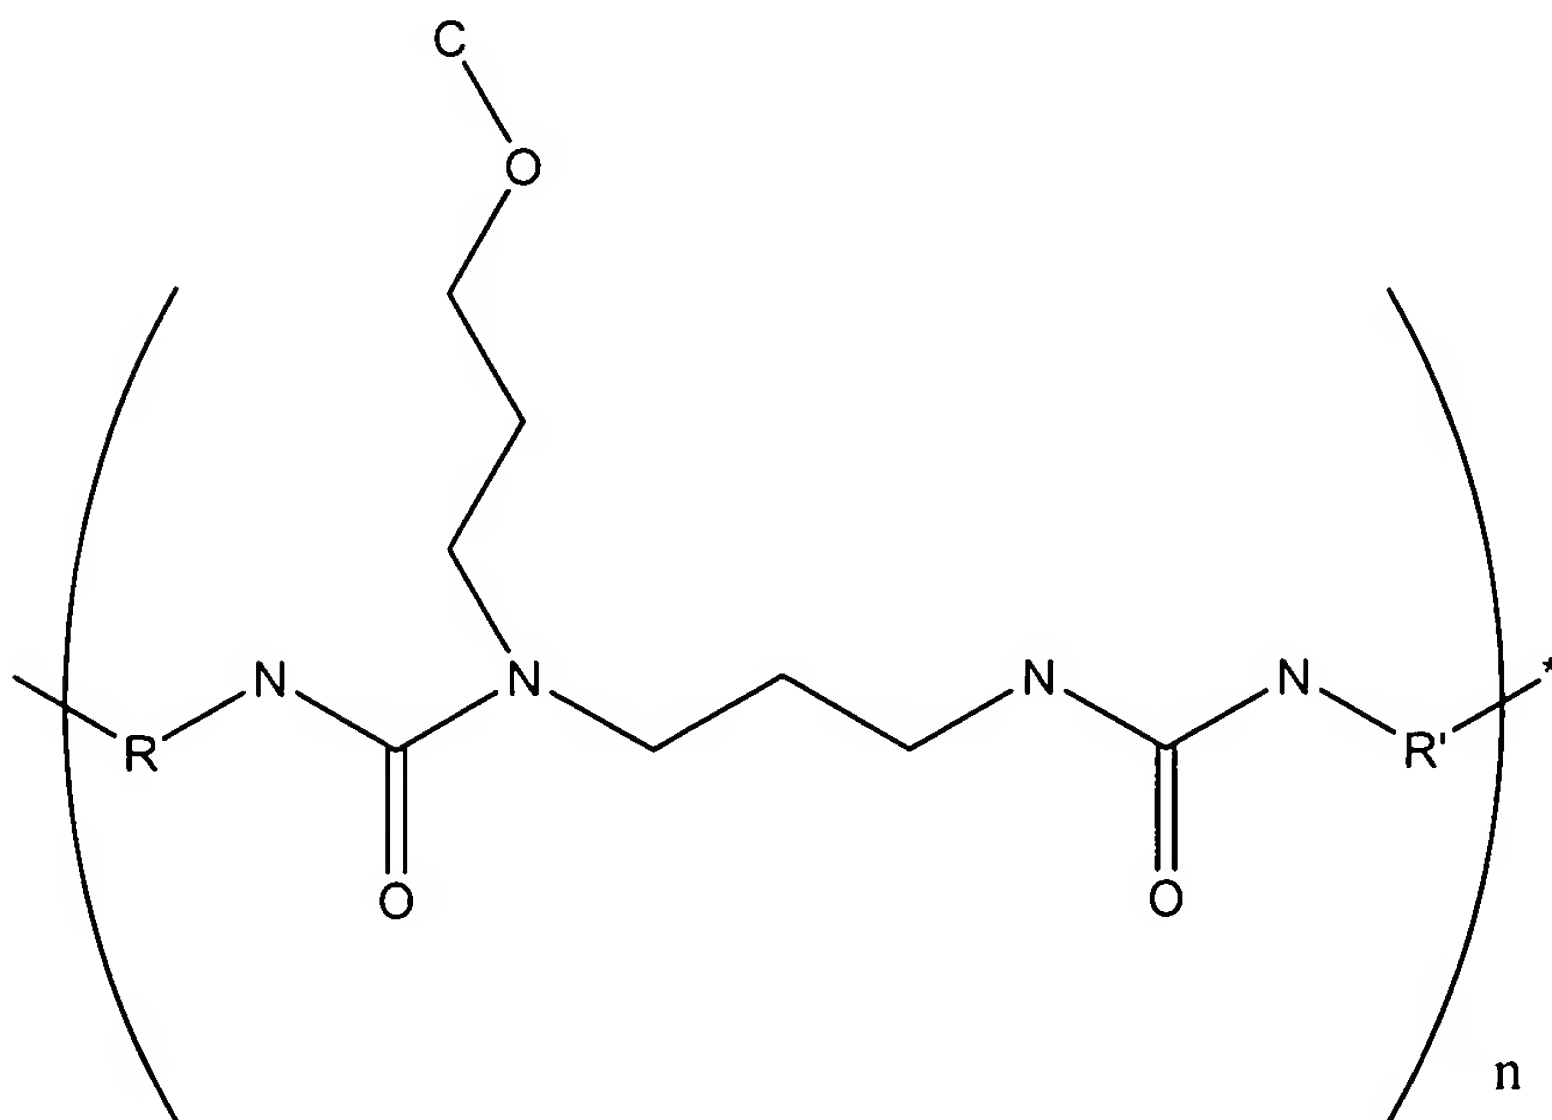

Kindly cancel claims 1-50 and 52 (all previously pending and withdrawn claims).

Kindly add new claims 53-60

CLAIMS

Claims 1-52 (cancelled).

Claim 53 (new): A polymer containing a fatty group pendant to the polymer backbone having the formula:

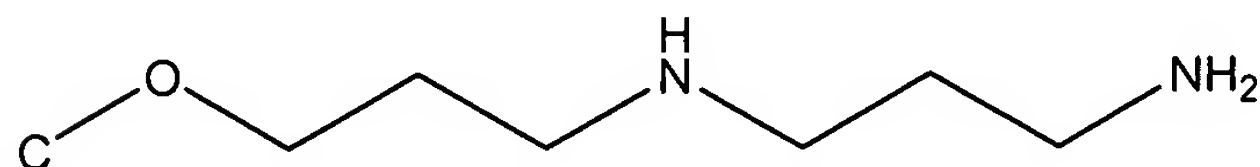

where C is a saturated or unsaturated alkyl group with between about 6 and 22 carbons and R and R' are the same or different and are independently chosen from the group containing $-(C=O)O-$, $-O(C=O)NH-$, $-HN(C=O)NH-$, $-O-$, $-OH$, $-CH_2OH$, CH_3 , $-(C=O)OH$, $-O((C=O)C=C)_m-$, $-N(C=O)-$, $-(O-SiH_2)_m-$, $-(CH_2)_n-$ where m is an integer greater than zero.

Claim 54 (new): The polymer of claim 53 wherein the pendant fatty group has an occurrence rate of from 25% to 100%.

Claim 55 (new): A surface coating comprising a polymer according to claim 53.

Claim 56 (new): A cast part comprising a polymer according to claim 53.

Claim 57 (new): The polymer that is the reaction product of an ether amine of the following structure:

and a polyisocyanate.

Claim 58 (new): The polymer of claim 57 wherein the pendant fatty group has an occurrence rate of from 25% to 100%.

Claim 59 (new): A surface coating comprising a polymer according to claim 57.

Claim 60 (new): A cast part comprising a polymer according to claim 57.
